

COVER LETTER
FOR ADVANCE ANALYTICS ROLE

I am currently in 3rd year in Engineering Physics and mostly work on data driven Physics. I have done some relevant courses like Data Science and Analysis, Introduction to AI , Statistics and Probability and digital systems.

I feel myself suitable for this role as i did two of my btech project and summer project in Data Science and Analysis (using Deep Learning and Machine Learning Algos). They were based on Astronomical Data. It also included a lot of Data preprocessing and Visualisation. Also i am highly interested in Applied AI for real world problems and want to make my career in this field. Therefore, i will be highly obliged, if given a chance as an intern.

Thank you
Pratyaksh raj
